adult / adulte / adulte

Person height: 5'2" to 5'10" (157.5 cm to 177.8 cm)
Weight capacity: 300 lbs (136 kg)
User height: 5'2" to 5'10" (157.5 cm to 177.8 cm)

tail adult / adulte alto / adulte grand

Person height: 5'2" to 5'10" (157.5 cm to 177.8 cm)
Weight capacity: 300 lbs (136 kg)
User height: 5'2" to 5'10" (157.5 cm to 177.8 cm)

FOR MAXIMUM FIT AND ASSEMBLY:

- Height: Adjust height by gliding both push buttons, holding feet steady, and pulling down until desired patient height is achieved. To help in doing this, the foot plates have a color-coded ring that fits in the color-coded location of push button. Release foot plates again until both push buttons snap back into place.
- Handgrip: Adjust handgrip to fit an approximately 10" hand or wrist circumference.
- Safety Check: With crutches positioned per step 1, confirm patient can push forward comfortably while leaning on the crutches. If unable, the hand rest may need to be placed on a lower height. Ensure both push buttons are firmly in place and handgrip nuts are tightened properly.

CAUTION: Use when proper training, under the direction of your doctor or physical therapist. Review instructions. If unsure, stop handgrip being too tight. Do not use crutches on wet or slippery surfaces. Not to use with regular roller shoes.

Substitution of parts without parts and assembly instructions can result in injury. See who, when, how and where to get parts. Call 1-800-368-7777 for more information.
